Early Inclusion through Learning from Each Other Newsletter March 2016

Dear colleagues in education and care of children,

Dr. Pretis Social Innovative Network (Graz, Austria) coordinates the Erasmus+ EU-Project “Early Inclusion through Learning from Each Other”, which started in October 2015 and is scheduled for 30 months.

This project will focus on an increased knowledge and shared methods concerning pre-school children who have a disability or are at risk of becoming disabled. Today we would like to inform you about the current project stage.

The first of our three products is ready to use and is available on www.early-inclusion.eu.

The “**Inclusion Briefing Packs**” provide

- information sheets related to educational needs of children with special needs concerning autism spectrum disorder, fetal alcohol spectrum disorders, sensory impairments, rare chromosomal disorders, premature birth, mental health, Fragile X, effects of drug use, attention deficit hyperactivity disorder, and attachment
- specific exercises and reflection questions - based on Learning Outcome Model and levels of the European Qualification Framework

Within a short time we are going to open our “**Inclusion Method Market**”. It is a “self-organised methodological online exchange market place”. Professionals from diverse sectors are invited to describe/upload successful inclusive situations. These concrete situations provide a methodological collection of ideas and learning opportunities for other users.

Furthermore, users will have the opportunity to earn an “**Inclusion Training Passport**” and to receive individual credits for their portfolio.

More about project consortium, products, tools, dissemination, events, participation and useful links:
