

Dear Parent / carer

We understand that many of the children and young people attending the school require complex enteral feeds. These may need to be made up at home and will therefore come into school without the original packaging. It may also be necessary to add other items to a feed during the school day, such as calogen, thickener or polycal. To ensure the safe administration of enteral feeds in school, please could you provide the following information;

Detail of feed made up at home; including anything additional provided, that needs to be added to the feed during the school day.

As the parent / carer of I take full responsibility for ensuring that any enteral feeds, including anything I provide, that may need to be added to the feed during the school day is made up according to’s prescription and are within the expiry date.

Name _____ Parent / Carer

Signed _____

Date _____

Many thanks for your co-operation.
